

## PROPOSAL

Date: December 4, 2018

Project: 135<sup>th</sup> Street Metra Station & Parking Lot  
Village of Romeoville

Project Details: **Romeoville Metra Station: Building Cameras**

Total Automation Concepts, Inc. is pleased to provide the following proposal for Romeoville Metra Station building security cameras. Per discussions and site visits, we are submitting the following:

**A. Metra Building Security Cameras:**

- Provide and install lockable enclosure. Enclosure shall house the recording PC, Comcast router and necessary connectivity for the cameras and point-to-point.
- Provide and install (2) megapixel IP dome cameras inside the Metra station. Cameras shall be mounted on either end of the interior space for general coverage.
- Provide and install (1) multi-sensor megapixel IP dome camera on the exterior corner of the Metra building. The 180degree view shall cover the general walkway, crosswalk and tracks.
- Provide and install point-to-point solution between the Metra building and the nearest Code Blue help station.
- Provide and install small form factor Dell PC with 10TB of external drive space and VideoInsight VMS software. PC shall be installed in the new wall mounted enclosure.
- Provide new power circuit from the exterior power panel to the new wall mounted enclosure. TAC shall surface mount conduit on the rear of the building from the power panel to an entry point that is appropriate.
- Provide all necessary cabling and terminations for each camera.
- Provide system setup and programming.

**Notes Regarding Project:**

- Overtime or premium labor not included in proposal.
- Bonds/permits/inspection not included in proposal.

**Investment:-----\$8,185.00**
