Sign Proposal for Mongo's at 1101 N. Independence

The applicant, Steve Spandonidis, is requesting the existing sign be allowed to remain and be altered to include a digital message board sign. The existing pole sign is 25 feet tall. It is approximately 110 square feet in area with roughly half of that area comprised of a manual letter message sign.

Existing Sign

Current code for freestanding signs requires a monument sign that is no more than 10 feet tall and no more than 25 square feet in area. Digital message boards are allowed to be up to 50% of the sign area. The applicant would like the current height and square footage to remain due to the nature of IL 53. In this area, IL 53 is a high traffic, high speed route that slopes up hill and curves at this location. This makes signage difficult to see as you are travelling north. The applicant believes a smaller, shorter sign would be very hard to see until you were past it.

Existing sign facing north from 500 Ft. away

Existing sign facing south from 500 Ft. away

Existing sign facing north from 250 Ft. away

The proposed sign would add a monument base to the existing pole as well as a landscaped area. The manual message sign would be changed out for a digital message sign.
